

ABOUT EGYPTIAN TECHNOLOGIES

Egyptian Technologies was initially formed in 2003 by Webmaster, Garrett Collier and Software Engineer, Alex Burke in order to explore ways to increase Southern Illinois' exposure on the web.

Over the years, in order to help fill the technology-gap in the region, we have evolved from building only small web sites and graphic design jobs, to creating entire business infrastructures with the latest in server and backup systems based on some of the most reliable network components in the industry.

We also specialize in disaster recovery; saving your business thousands of dollars by rescuing data from downed systems.

How Do You Solve IT?

Egyptian Technologies helps you answer the toughest questions when it comes to solving an IT problem. Whether you are a new business that needs to setup a computer network, a developed company needing a strong presence on the World Wide Web, or just simply in-need of someone to alleviate the stress of a malfunctioning desktop;
We Can Handle IT.

If your business is in Southern Illinois, you want to do business in Southern Illinois. -And should you ever need to make a call to “Tech Support” you want the person on the other end to know that there is a difference between Illinois and Chicago!

Egyptian Technologies’ core business focuses on creating and maintaining exceptionally built web sites for businesses in our region. We strive to provide the same courtesy and level of service your customers expect from you.

Web sites can be as simple as listing your core services and providing a way for customers to find you on the internet. -They can also serve as your main point of sale or as a sales tool illustrating products and services your company provides.

No matter how big or small your job; Egyptian Technologies has the ability to develop, maintain, and host your online presence.

On-Site Repairs

Fact: The average business has \$60,000 worth of computer data and many of them have little or no protection at all.

Fact: It does not take a dramatic natural disaster to make you lose your data. Every day viruses, worms, hard drive crashes, software failures, and theft turn businesses upside down in an effort to recover information and resume operations.

Fact: The average PC data loss can cost more than \$2,000 when you consider technical support for recovery, lost productivity, and lost data.

Egyptian Technologies can help you prevent such a catastrophe by evaluating your current (or planned) infrastructure and provide a comprehensive strategy that will save you money and downtime.

Some of the many services we offer:

- Network design, Implementation & Management
 - Network Security & Remote Linking
- System performance evaluations, upgrades, repair
 - Disaster Mitigation & Recovery
 - Server Deployment & Maintenance
- Antivirus/AntiSpyware Countermeasures

Why say one thousand words when a single photo will do? Whether you want to post product photos for your online store, have an event that you would like to cover with a roaming photographer, need a new logo designed or have a special need that requires a discriminating eye; Egyptian Technologies graphic design department can meet your needs.

Do you have a photo in-mind that just needs some detailing? Egyptian Technologies employs a full suite of digital photo/image editing capabilities that is sure to please!
